

WEED MANAGEMENT INITIATIVE

Impact Area

Soil conservation

Robusta areas of Espírito Santo state
Phase 1: Early 2018

Expected Outcome

Soil erosion and derivate problems (e.g.: use of herbicides, limited organic matter) in coffee significantly reduced through proper weed management by using field-tested training materials and access to know-how and learnings.

Expected Output

1,500

Growers reached via field days

Activities – ongoing

Trainings

Coffee Field Days

Technical Guide CETCAF

Benefits

Optimize your sustainability investments

Access to state of the art weed management tools and resources

Amplification through GCP communication channels

Partners

GET INVOLVED!

Join the initiative

in 2019 and contribute with co-funding, expertise, or other resources and discover innovative ways to address a key issue in the Brazilian coffee sector.
